CALL'S ROSES ARE BETTER

Roses thrive best in clay loam enriched with well rotted manure. They should be planted in an open, airy situation, unshaded by trees or buildings wherever possible. A good, rich soil is a great aid to produce blooms and it is advisable to make it so by working into the soil some well rotted manure and leafmold.

66 YEARS OF EXPERIENCE IS YOUR GUARANTEE OF SATISFACTION

While we are going through trying times at present, we have been able to maintain most of our reliable and experienced force, so that we can fill all orders received from our customers. Should there be any delay in shipments, due to the war effort, we stand ready to make necessary replacements or adjustments to the full satisfaction of every customer.

Further, with costs of materials and labor increasing it is costing us more to pack orders for shipment. With this in mind, we suggest that you group your order with neighbors or friends. This will also give you the benefit of lower transportation costs and it will facilitate the handling, by the transportation companies, of more war materials.

May we have the pleasure of serving you?
